

Joyesh (*Josh*) Meshram

7717-2090 | polixonrio@gmail.com | [LinkedIn](#) | [GitHub](#) | Aalborg, Denmark

ABOUT ME

Newly graduated software developer with project and internship experience in Python, machine learning, data analysis, and full-stack development. I enjoy analyzing problems, building practical solutions, and occasionally convincing code to behave as intended.

SKILLS

Programming Languages: Python, SQL, JavaScript | **Tools:** Git, GitHub, Docker, Tableau

English: Fluent (TOEFL iBT 109/120) | **Danish:** Intermediate/B1 (DU3 Module 4) | **Chinese:** Elementary (HSK 2, 198/200)

Certifications: Machine Learning with Python – edX MIT

EDUCATION

Aalborg University

MSc in Computer Science (GPA: 10.1/12)

Sep 2024 – Jun 2026

Denmark

GHRCE

Bachelor of Technology in Computer Science and Engineering (GPA: 8.78/10)

Jun 2019 – Jun 2023

India

EXPERIENCE

Machine Learning Intern | *Python, PyTorch, Sci-kit Learn, Polars*

Lån & Spar Bank

Aug 2025 – Jan 2026

Denmark | Remote

- Collaborated with the bank to classify transaction alerts and identify characteristics of at-risk individuals.
- Used large-scale confidential and anonymized transaction data to train machine-learning models for anti-money laundering.

Full-Stack Intern | *SvelteKit, PHP*

Asterisc Technocrat

Dec 2022 – Jun 2023

India | On-site

- Built internal customer management tooling with SvelteKit and PHP.
- Developed a zero-cost automated email process using Gmail and Spreadsheets to send up to 180,000 emails per year.

Algorithmic Trading Developer Intern | *Python, C++*

Freelance

Sep 2022 – Nov 2022

USA | Remote

- Worked on multiple projects to deliver solutions for clients regarding algorithmic trading.
- Wrote Python trading bots for 24/7 trading using WebSockets and integrated the Bybit API for real-time trading.
- Wrote custom Sierra Chart studies with C++/ACSIL to build indicators and strategies.

PROJECTS

Master's Thesis – Relative Scoring for Full-Spectrum Out-of-Distribution (OOD) Detection ([View](#)) | *Python, Sci-kit Learn*

- Studied how full-spectrum OOD detection degrades under covariate shift in image classification.
- Investigated whether class-relative scoring improves the performance of baseline detectors.

Data Analysis and Visualization – Airline Reviews ([View](#)) | *Python, Pandas, NumPy, Matplotlib, Plotly, Jupyter*

- Analyzed and visualized 100,000+ airline reviews and identified factors affecting passengers' overall experience.

Web Scraping – LeetCode Problems ([View](#)) | *Selenium, Requests, Pandas, Beautiful Soup*

- Scraped LeetCode problem information from the official website and collected data from 2,700+ pages.
- Used Selenium to dynamically load pages, scrape HTML, and parse the HTML data with Beautiful Soup.

Dashboard – Bookshop Sales Analysis ([View](#)) | *Tableau, Microsoft Excel*

- Cleaned and organized raw bookshop sales data in Microsoft Excel and built a Tableau dashboard to visualize sales across different dimensions.

Machine Learning Fine-Tuning – OpenAI Whisper ([View](#)) | *Python, Hugging Face*

- Fine-tuned OpenAI Whisper models for Frisian speech recognition, a low-resource language setting.
- Achieved cross-lingual transfer from Dutch to Frisian, since Whisper does not natively support Frisian.

EXTRACURRICULARS

- Attend a weekly research-paper discussion group to stay current with the latest LLM research.
- Research and implement networking techniques related to internet censorship resilience and network security.
- Volunteer with the internet (network) association at my student dormitory in Aalborg.
- Organized a full-day Model United Nations conference at my former high school during my undergraduate studies.
